Overview

This one day second L.UCA.RRE congress will feature International and French expert faculty. It will be dedicated to organ preservation in distal-middle rectal cancers. Data presented will be exclusively reporting ongoing phase III trials with different strategies aiming at rectal preservation : Total neo adjuvant treatment with various RT-chemotherapy regimens, External beam radiotherapy dose escalation, local excision and endocavitary brachytherapy boost. The afternoon session presentations will focus on response assessment, quality of life and MRI. The new ESMO guidelines and multidisciplinary clinical case tumor board will end the presentation. This congress is intended for colorectal surgeons, radiation and medical oncologists, gastroenterologists, radiologists and other oncology care team members interested in rectal cancer. Language will be English with no simultaneous translation.
